

RAMNI DEEP DHAM

Ram-Janki Mandir

Official Digital Platform — Project & Management Document

Document Type	Project / Authorization / Management Record
Project	Ramni Deep Dham Web Application
Platform	Web Application
Version	1.0.0
Year	2026
Access	Free Community / Seva Initiative
Technical Partner	Haproven

This document is intended to record the purpose, development, authorization, access model, and ongoing technical management of the digital platform. Fields marked with blanks are to be completed and signed by the relevant authorized persons.

1. Project Overview

Ramni Deep Dham is a dedicated web application created for Ram-Janki Mandir. The platform is intended to provide devotees and visitors with convenient access to temple information, announcements, upcoming events, gallery updates, location details, and other useful information in one place.

2. Purpose of the Platform

The purpose of this digital platform is to make temple-related information simple, accessible, and organized for the community. The platform is designed to support communication, information sharing, and a modern online presence for the temple.

3. Nature of the Initiative

The platform is being provided as a free digital community / seva initiative. No development or access fee is intended to be charged to devotees for normal use of the platform, subject to any separately approved future arrangements.

4. Temple / Community Association

The platform is created for Ram-Janki Mandir and may be used to publish or present information approved or supplied by the Temple Seva Samiti / authorized temple representatives. The temple-side representatives are responsible for confirming the accuracy and approval of official temple information before publication where applicable.

5. Development & Technical Contribution

The web application was designed and developed by Susheel Kumar, Founder of Haproven. Haproven may provide technical development, improvements, maintenance, hosting-related support, and other web-technology assistance for the project.

6. Management & Maintenance

Future technical updates, bug fixes, design improvements, content-support mechanisms, and maintenance may be handled by the Haproven team in coordination with the Temple Seva Samiti or other authorized temple representatives. Content ownership, approval, and temple-related decisions remain subject to the authority designated by the temple/community.

7. Platform Features

The platform may include temple information, announcements, upcoming events, temple gallery, location / directions, important updates, and other pages or features introduced during future development.

8. Access & Public Use

The platform is intended to be publicly accessible through the web. Users are expected to use the platform respectfully and only for legitimate informational and community purposes.

9. Content & Accuracy

Temple names, dates, event information, announcements, schedules, images, contact details, and other community information should be reviewed and approved by an authorized representative before being treated as official. The technical team may publish or update content based on approved information provided to it.

10. Intellectual Property & Credits

The software, interface, code, design components, and technical implementation may contain original work by the development team and third-party libraries or services where applicable. Temple names, marks, photographs, documents, and community materials remain subject to their respective ownership or permission. Appropriate credits should be retained wherever required.

11. Future Development

The platform may be expanded with additional pages, features, accessibility improvements, security updates, performance improvements, event tools, notification features, or other functionality based on community requirements and technical feasibility.

12. Contact / Responsible Representatives

Temple-side representative: _____
